

# MULTI-COLOR SPECIFICATION FOR SMD 2727WSE

# MC-S2727WSE

FEATURES: • Size (mm):2.7×2.8×2.5

• Surface not reflective

• High Luminous Intensity

High reliability

• Good UV resistance performance

• Pb-free Reflow soldering Application

• RoHS Compliant

#### 6. SOLDERING

• Recommended Reflow Soldering Condition(Lead-free Solder)

• Recommended Hand Soldering Condition

Temperature	350°C Max		
Soldering Time	3sec Max		

- \* This LED is designed to be reflow soldered on to a PCB. If dip soldered, Multi Color cannot guarantee its reliability.
- \* Reflow soldering must not be performed more than twice. Hand soldering must not be performed more than once.
- \* Avoid rapid cooling. Ramp down the temperature gradually from the peak temperature.
- \* Nitrogen reflow soldering is recommended. Air flow soldering conditions can cause optical degradation, caused by heat and/or atmosphere.
- \* Repairing should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-heat soldering iron should be used.
  - It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.
- \* When soldering, do not apply stress to the LED while the LED is hot.
- \* This product can differ in optical characteristics depending on the number of reflow cycles.

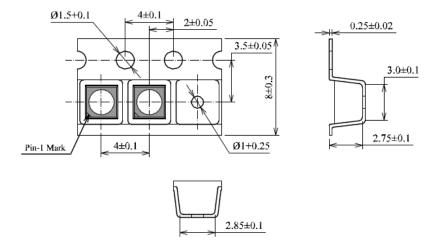

In a single display, only LEDs with same number of reflow cycles should be used regardless of the application type, such as rental and/or permanent installations.

# 7. TAPE AND REEL DIMENSIONS

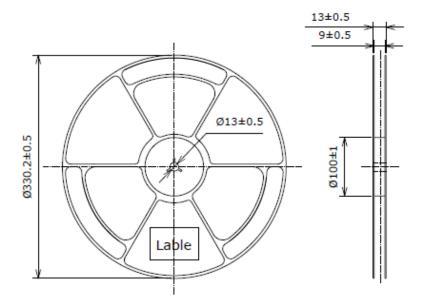

Tape: (Unit: mm)

Trailer and Leader:

Reel:

Quantity per reel=5000pcs

# 8. PACKAGING - TAPE & REEL

Reels are shipped with desiccants in heat-sealed inner moisture-proof bags.

Inner moisture-proof bags are shipped with desiccants in heat-sealed outer moisture-proof bags.

Outer moisture-proof bags are packed in cardboard boxes with corrugated partitions.

- \* The Label shows: P/O NO., TYPE, QTY, IV, VF, WLD, BATCH CODE.
- \* Products shipped on tape and reel are packed in moisture-proof bag.

  They are shipped in cardboard boxes to protect them from external forces during transportation.
- \* Do not drop or shock the box. It may damage the products.
- \* Using an original packaging material or equivalent in transit is recommended.

Address: No. 300, The 10<sup>th</sup> Avenue, East HETZ, Hangzhou, China

#### 9. MOISTURE PROOF PACKAGE

- When moisture is absorbed into the SMT package it may vaporize and expand during soldering. There is a possibility that this can cause exfoliation of the contacts and damage the optical characteristics of the LEDs. For this reason, the moisture proof package is used to keep moisture to a minimum in the package.
- The moisture proof package is made absorbent material (silica gel desiccants) is inserted into the aluminium moisture proof baq.
- The silica gel desiccants change from blue to red if moisture had penetrated bags.

#### 10. STORAGE CONDITIONS

- •Before opening the package, must check if the package bag is well packaged or damaged.
- If the package is damaged, please return back to Multi-Color.
- •After opening the package:
  - After this bag is opened, devices that will be subjected to infrared reflow, vapor-phase reflow, or equivalent processing Must be:
- a) Mounted within 24 hours at factory condition of ≤30°C /60%RH.
- b) If unused LEDs remain, please return these LEDs back to Multi-Color.
- •The LEDs must be used within 6 months.

The LEDs should be kept at less than 30°C and less than 60%RH.

#### 11.STATIC ELECTRICITY

- Static electricity or surge voltage damages the LEDs.
  - It is recommended that a wrist band or an anti-electrostatic glove be used when handing the LEDs.
- All devices equipment and machinery must be properly grounded. It is recommended that precautions be taken against surge voltage to the equipment that mounts the LEDs.
