## 6. SOLDERING

- Recommended Reflow Soldering Condition(Lead-free Solder)

- Recommended Hand Soldering Condition

Temperature	350°C Max
Soldering Time	3sec Max

- Recommended Soldering Pad Pattern

- \* This LED is designed to be reflow soldered on to a PCB. If dip soldered, Multi Color cannot guarantee its reliability.
- \* Reflow soldering must not be performed more than twice. Hand soldering must not be performed more than once.
- \* Avoid rapid cooling. Ramp down the temperature gradually from the peak temperature.
- \* Nitrogen reflow soldering is recommended. Air flow soldering conditions can cause optical degradation, caused by heat and/or atmosphere.
- \* Repairing should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-heat soldering iron should be used.  
It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.
- \* When soldering, do not apply stress to the LED while the LED is hot.
- \* This product can differ in optical characteristics depending on the number of reflow cycles.  
In a single display, only LEDs with same number of reflow cycles should be used regardless of the application type, such as rental and/or permanent installations.

- Before opening the package, must check if the package bag is well packaged or damaged.  
If the package is damaged, please return back to Multi-Color.
- After opening the package:  
After this bag is opened, devices that will be subjected to infrared reflow, vapor-phase reflow, or equivalent processing  
Must be:
  - a) Mounted within 24 hours at factory condition of  $\leq 30^{\circ}\text{C}$  /60%RH.
  - b) If unused LEDs remain, please return these LEDs back to Multi-Color.

The LEDs should be kept at less than  $30^{\circ}\text{C}$  and less than 60%RH.

## 10. STATIC ELECTRICITY

- Static electricity or surge voltage damages the LEDs.  
It is recommended that a wrist band or an anti-electrostatic glove be used when handing the LEDs.
- All devices equipment and machinery must be properly grounded. It is recommended that precautions be taken against surge voltage to the equipment that mounts the LEDs.
