MULTI-COLOR SPECIFICATION FOR SMD 1921BSA

MC-S1921BSA

- FEATURES: Size (mm):2.05x2.15x1.90
 - Surface not reflective
 - High reliability
 - Good UV resistance performance
 - Pb-free Reflow soldering Application
 - RoHS Compliant

6. SOLDERING

• Recommended Reflow Soldering Condition(Lead-free Solder)

• Recommended Hand Soldering Condition

Temperature	350°C Max		
Soldering Time	3sec Max		

- * This LED is designed to be reflow soldered on to a PCB. If dip soldered, Multi Color cannot guarantee its reliability.
- * Reflow soldering must not be performed more than twice. Hand soldering must not be performed more than once.
- * Avoid rapid cooling. Ramp down the temperature gradually from the peak temperature.
- * Nitrogen reflow soldering is recommended. Air flow soldering conditions can cause optical degradation, caused by heat and/or atmosphere.
- * Repairing should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-heat soldering iron should be used.
 - It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.
- $\ensuremath{^{*}}$ When soldering, do not apply stress to the LED while the LED is hot.
- * This product can differ in optical characteristics depending on the number of reflow cycles.

 In a single display, only LEDs with same number of reflow cycles should be used regardless of the application type, such as rental and/or permanent installations.

7. TAPE AND REEL DIMENSIONS

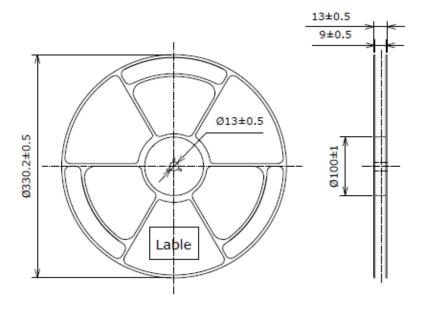

Tape: (Unit: mm)

Trailer and Leader:

Reel:

Quantity per reel=7500pcs

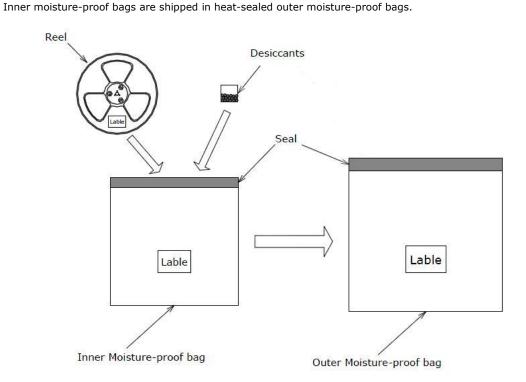

V0.2

8. PACKAGING - TAPE & REEL

Reels are shipped with desiccants in heat-sealed inner moisture-proof bags.

Outer moisture-proof bags are packed in cardboard boxes with corrugated partitions.

- * The Label shows: P/O NO., TYPE, QTY, IV, VF, WLD,BATCH CODE.
- * Products shipped on tape and reel are packed in moisture-proof bag. They are shipped in cardboard boxes to protect them from external forces during transportation.
- $\ensuremath{^{*}}$ Do not drop or shock the box. It may damage the products.
- * Do not expose to water, the box is not water-resistant.
- $\ensuremath{^*}$ Using an original packaging material or equivalent in transit is recommended.

9. STORAGE CONDITIONS

•Before opening the package, must check if the package bag is well packaged or damaged.

If the package is damaged, please return back to Multi-Color.

•After opening the package:

After this bag is opened, devices that will be subjected to infrared reflow, vapor-phase reflow, or equivalent processing Must be:

- a) Mounted within 24 hours at factory condition of \leq 30°C /60%RH.
- b) If unused LEDs remain, please return these LEDs back to Multi-Color.
- •The LEDs must be used within 6 months.

The LEDs should be kept at less than 30°C and less than 60%RH.

10. STATIC ELECTRICITY

• Static electricity or surge voltage damages the LEDs.

It is recommended that a wrist band or an anti-electrostatic glove be used when handing the LEDs.

• All devices equipment and machinery must be properly grounded. It is recommended that precautions be taken against surge voltage to the equipment that mounts the LEDs.
