7. SOLDERING

- Recommended Reflow Soldering Condition(Lead-free Solder)

- Recommended Hand Soldering Condition

Temperature	350°C Max
Soldering Time	3sec Max

- Recommended Soldering Pad Pattern

- * This LED is designed to be reflow soldered on to a PCB. If dip soldered, Multi Color cannot guarantee its reliability.
- * Reflow soldering must not be performed more than twice. Hand soldering must not be performed more than once.
- * Avoid rapid cooling. Ramp down the temperature gradually from the peak temperature.
- * Nitrogen reflow soldering is recommended. Air flow soldering conditions can cause optical degradation, caused by heat and/or atmosphere.
- * Repairing should not be done after the LEDs have been soldered. When repairing is unavoidable, a double-heat soldering iron should be used.

It should be confirmed beforehand whether the characteristics of the LEDs will or will not be damaged by repairing.

- * When soldering, do not apply stress to the LED while the LED is hot.
- * This product can differ in optical characteristics depending on the number of reflow cycles.

In a single display, only LEDs with same number of reflow cycles should be used regardless of the application type, such as rental and/or permanent installations.

8. PACKAGING – TAPE & REEL

Reels are shipped with desiccants in heat-sealed inner moisture-proof bags.

Inner moisture-proof bags are shipped in heat-sealed outer moisture-proof bags.

Outer moisture-proof bags are packed in cardboard boxes with corrugated partitions.

* The Label shows: P/O NO., TYPE, QTY, IV, VF, WLD.

* Products shipped on tape and reel are packed in moisture-proof bag.

They are shipped in cardboard boxes to protect them from external forces during transportation.

* Do not drop or shock the box. It may damage the products.

* Do not expose to water, the box is not water-resistant.

* Using an original packaging material or equivalent in transit is recommended.

8. STORAGE CONDITIONS

- Before opening the package, must check if the package bag is well packaged or damaged.

If the package is damaged, please return back to Multi-Color.

- After opening the package:

After this bag is opened, devices that will be subjected to infrared reflow, vapor-phase reflow, or equivalent processing

Must be:

- a) Mounted within 24 hours at factory condition of $\leq 30^{\circ}\text{C}$ /60%RH.
- b) If unused LEDs remain, please return these LEDs back to Multi-Color.

- The LEDs must be used within 6 months.

The LEDs should be kept at less than 30°C and less than 60%RH.

9. STATIC ELECTRICITY

- Static electricity or surge voltage damages the LEDs.

It is recommended that a wrist band or an anti-electrostatic glove be used when handing the LEDs.

- All devices equipment and machinery must be properly grounded. It is recommended that precautions be taken against surge voltage to the equipment that mounts the LEDs.
